

depicted on Map 13 on page 116 entitled, "Concentrations of Substandard Housing."

5) Citizen Awareness Program

Vance County should consider the formulation and use of a public awareness program which would be aimed at informing the citizens within Vance County about the County's existing and proposed land use and housing programs. This program should also be coordinated with the County's Citizen Participation Plan which was adopted in 1978. Also a county brochure which explains the various housing and land use related ordinances and programs and who to contact for related information would also prove valuable.
